

# **HISTORY OF THE SECTION ON CORNEA, CONTACT LENSES AND REFRACTIVE TECHNOLOGIES OF THE AMERICAN ACADEMY OF OPTOMETRY**

Dennis M. Kuwabara, O.D., F.A.A.O. (Revised: 12-22-09)

On January 11, 1922, nine optometrists and two physicians met at the Planters Hotel in St. Louis, Missouri for the express purpose of developing an organization for the "optometric study in higher branches and for the exchange of ideas in optometric work." Morris Steinfeld, the organizer of the group, was elected temporary chairman. A second organizational meeting was held at the Claypoole Hotel in Indianapolis, Indiana. On June 29, 1922, the American Academy of Optometry (AAO) was officially formed with Morris Steinfeld as Chairman, C. S. Brown as Vice-Chair and Carel C. Koch as Secretary/Treasurer. The stated goals of the newly formed AAO were to raise the standards of optometric practice, education, and ethics. The First Annual Meeting of the American Academy of Optometry was held at the American Annex Hotel in St. Louis, Missouri on December 9-13, 1922. At this inaugural meeting, papers were presented, luncheons and dinners held, business sessions conducted, and officers elected much in the same way they are today. The same officers were re-elected for another term with the only addition being E.E. Fielding as the Treasurer.

The roots of the Cornea, Contact Lenses and Refractive Technologies Section can be traced back to the Twenty-Third Annual Meeting held at the Stevens Hotel in Chicago, Illinois, December 10-12, 1944. A proposal to incorporate special sections in contact lenses and orthoptics was put forth and adopted. The formation of these early sections had great historical significance because they would eventually lead to the development of "diplomate" status within the Academy. It was three years later at the 26th Annual AAO Meeting held at the Palmer House in Chicago, December 13-16, 1947, that the Contact Lens Section (CLS) took the first step towards establishing itself. John C. Neill, the first CLS Chairman, proposed the creation of an examining board to qualify Academy members who desired to become a contact lens specialist. The Executive Council carefully considered this proposal and voted unanimously to establish this examining board. Academy members who passed the qualifications drawn up by this examining board were to be awarded diplomas certifying their ability to fit contact lenses. Appointees to this examining board were to be faculty members of optometric schools who taught contact lens fitting.

Considering contact lenses were still relatively new and the number of optometrists fitting them relatively small, the idea of declaring contact lenses fitting a specialty must have met with mixed reactions. From 1935 to 1939, at least 10,000 pairs of contact lenses, all made of glass, were sold in the United States. Plastic began to be used in the contact lens industry in 1937 with William Feinbloom's combination glass corneal section/plastic scleral section contact lenses. The "U" series of 1937 was followed by the "T" series in 1940. In 1938, Theodore Obrig discovered the advantages of using blacklight observations with a 2 percent aqueous solution of fluorescein in the fitting of scleral fluid or fluidless contact lenses. In 1939, plastic polymethylmethacrylate contact lenses were introduced into the United States by either Mr. Theodore Obrig or

Mr. Ernest Muller, or Istvan Gyorrffy, MD. Solon (Bud) Braff and Edward I. Goodlaw were early pioneers who worked closely associated with Kevin Tuohy and Phil Salvatori in the development of fitting scleral lenses. Braff's discovery that scleral lenses could be fit without anesthesia and Goodlaw's observations that contact lenses affected the osmotic character of the corneal epithelium (causing the corneal edema) laid the groundwork for the eventual transition from the scleral to the corneal lens as the design of choice. The introduction of PMMA simplified the fitting of both scleral and corneal contact lenses. Its only drawback was its impermeability to oxygen and carbon dioxide. Had it not been for this shortcoming, today's RGP lenses probably would never have come into existence. The Tuohy lens received its patent on June 6, 1950. After the Tuohy lens was introduced in 1948, the attention slowly shifted away from the scleral lens to the corneal lens. In 1946, 50,000 pairs of lenses were sold. By 1949, these numbers increased to 200,000 pairs primarily due to the introduction of the Tuohy lens. By today's standards, it is difficult to imagine that this lens design revolutionized the contact lens field. Tuohy's lens was large (11.5mm to 12.5mm), thick, fit flat (2.50D to 6.00D flatter than flat K), and had blunt edges. It is important to understand that the CLS was founded during the mid to late 40s and how difficult it must have been for the early founders of the Section to persevere in the early stages of the development of contact lenses.

"The Certification by Contact Lens Section" as stated in the February 1948, American Journal of Optometry and Archives of the American Academy of Optometry gives an overall perspective of how serious the CLS envisioned their role to be in the perpetuation of the art and science of contact lens fitting and the importance of the certification process.

#### PURPOSES OF CERTIFICATION AND THE EXAMINING BOARD

1. To elevate the standards of contact lens practice.
2. To determine the competence of practitioners professing to be specialists in the application of contact lenses.
3. To arrange and conduct examinations to test the qualifications of candidates who appear before the board for certification as specialists in the application of contact lenses.
4. To grant and issue certificates of qualification as specialists in the application of contact lenses to candidates successful in demonstrating their proficiency.
5. To establish a control panel of Diplomates who will act as advisors to candidates for the examinations.
6. To serve the public and the professions by indicating with a designated symbol in the Directory of the American Academy of Optometry that the individual has been certified as a contact lens specialist.

#### NO LEGAL OR PROFESSIONAL RESTRICTIONS

The certificate does not, of itself, confer on the Diplomate any legal qualifications, privileges, or license to practice the application of contact lenses. It is not the purpose or

intent in any way to interfere with, or to limit the professional activities of, any duly licensed optometrist. The chief aim is to elevate the standards of qualification for specialists in the application of contact lenses and to certify as specialists those Fellows of the American Academy of Optometry who appear before the examining board and are successful in meeting the requirements.

#### VALUE OF CERTIFICATION

The American Academy of Optometry recognizes the certificate as evidence of academic and clinical fitness in the practice of contact lens application. Diplomates will be recognized by a suitable symbol opposite their name in the Directory. This Directory listing will serve as a guide to other optometrists desiring to refer patients for consultation services in this specialty.

#### REQUIREMENTS

All candidates who are presently engaged in contact lens practice and who file application for examination before December, 1948, will be required to submit the records of 20 successful contact lens cases which he has completed, together with evidence of formal instruction or its equivalent in the application of contact lenses. Upon acceptance of these prerequisites by the examining board the candidate will be notified to appear before the board for oral, written, and practical examinations which will be given immediately preceding the December 1948, meeting of the American Academy of Optometry.

Those candidates who file application before December 1948, and who have not completed the prerequisite number of cases will be notified to appear for examinations but the awarding of the certificate will be withheld pending completion of the required number of cases.

Candidates who file application after December, 1948 must:

- (a) Submit a statement from an accredited optometric institution showing satisfactory completion of a post-graduate course of instruction in the application of contact lenses.
- (b) Submit the records of 20 successful contact lens cases which have been completed under the supervision of a member of the control panel who has been assigned to the candidate.
- (c) Appear before the examining board for a practical, oral and written examination.

#### THE CONTROL PANEL

Diplomates of the 1948 and subsequent examinations will serve as a control panel for the certification of candidates who apply after the 1948 examination. A member of the control panel will be assigned to each candidate and it will be the duty of the panel member to assist the candidate with each of his cases. Within geographic limitations an effort will be made to bring together the panel member and the candidate with his patient, for the purpose of consultation. Where for geographic reasons, it is impracticable for the candidate to consult personally with the panel member; the

candidate will keep the panel member informed by correspondence with his progress in application of contact lenses to each of his patients.

When the candidate has successfully completed the prerequisite number of cases under the supervision of the panel member assigned to him, the panel member will validate each case to the examining board.

#### PREPARATION FOR CERTIFICATION

All candidates will be examined in the subjects basic to the application of contact lenses. These subjects will include the anatomy, histology and physiology of the anterior segment of the eye and its adnexa, the chemistry of contact lens solutions, the optics of contact lenses and the pathology and the therapeutics associated with contact lens practice. The candidate will also be examined in the historical development of contact lenses as well as the modern forms of such lenses, including both molded and trial case types. The practical examination will be limited to the particular method or methods employed by the candidate in applying contact lenses to the cases reported by him to the examining board; however, he will be expected to be able to discuss intelligently other methods of contact lens application.

In preparing for the examination the candidate will be guided by the syllabus prepared by the examining board. A sample of the form to be used in submitting case records will be furnished the applicant.

#### FEES

An applicant form will be furnished to each applicant and this form must be filled out completely and accurately and returned to the secretary together with an application fee of \$10.00. The examination must be taken within three years of date of application. When the candidate is notified to appear for examination an examination fee of \$25.00 must be remitted to the secretary.

Following the 1948 examination, examination fees will be carefully computed on a basis of the cost of administering the examination. All fees will be used entirely for administrative expenses. Examiners will serve without compensation other than actual expenses.

#### RE-EXAMINATION

Candidates who have failed one or more subjects may be re-examined upon satisfactory evidence of adequate additional preparation and payment of the examination fee. A minimum of one year must elapse between examinations.

#### REVOCACTION OF CERTIFICATE

The Certificate of Qualification may be revoked in the event that:

- (a) Any representation or statement made to the board by the Fellow, including statements contained in his application for certification, shall have been false or intentionally misleading.

- (b) The Fellow so certified shall violate the standards of practice of optometry required by the American Academy of Optometry; or the revocation, forfeiture or suspension of his license to practice optometry.
- (c) Upon revocation of any Certificate of Qualification by the Academy as aforesaid, the holder thereof shall return his Certificate of Qualification and all other evidence of qualification to the secretary and his name shall be removed from the list of Diplomates.

The first contact lens certification examination was given at the Twenty-Seventh Annual Meeting held at the Robert E. Lee Hotel in Winston-Salem, North Carolina, December 4-7, 1948. The first twenty-one candidates who took and passed the certification examination were: L. Lester Beacher, Otto J. Bebbler, Henry B. Day, Jr, Vincent J. Ellerbrock, William Feinbloom, Isadore Finkelstein, Eugene Freeman, Robert C. Graham, Arthur E. Hoare, D.G. Hummel, Russell S. Manwiller, Bernard Mazow, Meredith W. Morgan, Jr., John C. Neill, J.S. Nupuf, William W. Policoff, Nathan A. Robbins, I. Irving Vics, Irving Weiss, and S. G. Weiss. The members of the first examining board were: V.J. Ellerbrock, Meredith Morgan, John Neill, D.G. Hummel (an ex-officio member).

Under the direction of John C. Neill, the examining board mapped out the examining program for 1949 as follows. The chairman would prepare study outlines to aid candidates in the following subjects:

- (1) optics in contact lenses
- (2) chemistry of contact lens solutions
- (3) anatomy and physiology of the anterior portion of the eye and its adnexa
- (4) pathology involved in contact lens fitting
- (5) (a) history of contact lenses,  
(b) types of contact lenses  
(c) methods of fitting and adjusting contact lenses.

The 1949 certification examination was divided into three parts:

- (1) Written examination based on the questions submitted by board members
- (2) Oral interview
- (3) Practical examination in which the candidate will fit lenses to a patient, using the method of his choice.

By the 1960's, the Academy had reached nearly 1,000 members. The Sections continued to grow in prominence as informal discussion groups devoted to their particular area of special interests. Although papers were presented, they were not of the formal variety presented today. The Sections maintained an open door policy welcoming anyone interested in their particular subject matter to participate by entering into the discussions or presenting a paper. Since these papers or discussions were not reported on in the Academy journal, attendance was imperative, if one was to benefit

from these presentations. While they were clinical in nature, they were not formal courses or education sessions as were the postgraduate courses.

H.B. Peters, in a July 1961 article on the "Sections of the American Academy" published in the *Am J Optom Arch Am Acad Optom.*, reported on how Robert Graham, CLS Chairman described the Section on Contact Lenses and Subnormal Vision, Aids.

"In recent years the upsurge of interest in contact lenses has been reflected in the activities of this Section. A large and lively group of fellows have regularly attended these discussion sessions. The Section has been called upon to arrange a two-hour symposium on contact lenses for the general session. The Section carries on a certification program and regularly examines and certifies as contact lens specialists those candidates who qualify.

The programs for the coming meeting will be shaped around the following subjects: (a) the accurate determination of corneal topography; (b) bifocal contact lenses; (c) toric, bitoric and perforated contact lenses; (d) current advances in subnormal vision aids; (e) the latest significant developments in the field of contact lenses. Interested Fellows are invited to participate."

1964 was the year of the "Stone Blind" scare. Dr. William Stone issued a statement that methacrylate acid was being released from PMMA lenses causing blindness in PMMA contact lens wearers. Chairman of the AOA Contact Lens Section at the time, Maurice G. Poster recalled this sensational statement created a tremendous amount of controversy, involving a U.S. Senate hearing, before this allegation was proven to be completely false and having no basis in fact.

**C.A. "Ted" Bayshore, a CLS Chairman (1967-1968)** and Section Secretary for 16 years, remembers the mid 60's as a time of revolution and change within the organizational structure of the CLS. As a 1962 Diplomate, he found the Section to be loosely organized and made up of Fellows who were active in the evolution of contact lens fitting. They met at the Academy's Annual Meeting and utilizing an informal examination process passed those who met the qualification requirements and demonstrated potential in fostering the development of contact lenses. He viewed the Section as an elite "club" of specialists which tended to be self-perpetuating. This club atmosphere did not sit too well with the newer breed of optometrists affiliated with the Universities and in more formal academic settings. He found himself in the middle of this discord and soon became the spokesman for the CLS with the Executive Council. In 1965, the stage was set for the CLS to undergo a dramatic change. Dan Elliott was CLS Chairman at that time and Harold Moss was Vice-Chair. Bayshore recalls that in an uncustomary manner for the Academy, this two-year CLS appointment was cut off in mid-term with Harold Moss elevated to Chair and he to the Vice-Chair position for a period of one year (1965-1966). The following year he assumed a two-year term as Chair with Maurice G. Poster as Vice-Chair. It was during this term that he secured the assistance of Morton D. Sarver and others of university stature to write up a formal examination and revamp the Section. The format established by Sarver and his colleagues served as the model for the other Academy Sections. This formalization of the Academy Sections moved the Sections from an informal level to a higher level of

academic quality with a credible, valid examination process. In a major concerted effort, the CLS recruited, examined, and conferred Diplomate status on many of the contact lens leaders, who had previously boycotted the Section because of its “club” atmosphere. From this point forward, the CLS gained considerable prominence and became a more dominant force within the Academy hierarchy.

**Morton D. Sarver (1969-70)** assumed the CLS Chair in place of Maurice G. Poster, who was next in line to be the CLS chairman to avoid a potential conflict of interest with the AOA. Had the switch not been made, Poster would have held the chairmanship of both the AOA Contact Lens Committee and the AAO Contact Lens Section at the same time. Although this potential problem was resolved, it was to be the first of many conflicts that would test the resolve of the delicate relationship between the AOA Contact Lens (Committee) Section and the AAO Section on Cornea & Contact Lenses.

As the membership and interest in the Academy continued to grow, the format of the annual meetings also had to undergo change. With the huge increase in the number of formal papers proposed for presentation, the growth in the volume of material on the program of the six sections, and the vast array of CE courses filling the days, scheduling became a major undertaking. Programs were beginning to overlap with as many as six CE courses were being offered simultaneously. To counter these problems, time limitations were imposed on the presentation of papers and discussions were limited to five minutes. More research in vision was being conducted in the 1970's than at any time before. With the proliferation of various types of contact lenses, low vision becoming a significant part of optometric service, sports vision gaining prominence, introduction of new techniques for detection of ocular pathology, and a general explosion of knowledge in visual science, the subjects available were increasing rapidly. With the opening of several new schools, there were more optometric educators and faculty members. Many of these educators were PhDs carrying on research and needed a forum in which to report on their research.

**Maurice G. Poster (1971-1972)** recalls as the Chair, he had the first meeting relating to soft contact lenses, which was held in Toronto, Canada. It was in 1971, that Bausch and Lomb was cleared by the FDA to distribute soft contact lenses in the US. There were two panels of 5 ODs and 5MDs who tested this new contact lens design. During his term of office he represented the Academy at both the FDA and the Federal Trade Commission. Morton D. Sarver was in charge of the continuing education courses for the Section so the courses were extremely successful. With the untimely death of Max Schapero in 1972, the CLS Max Schapero Memorial Lecture was established in his honor. The first recipient of this 1973 Memorial Lecture Award was Irving Fatt, PhD.

The Contact Lens Section had been granting certificates since 1948. It started slowly, but as contact lens practice grew, many more optometrists sought Diplomate status and the number in the Contact Lens Section increased considerably. The value of this certification had been discussed many times, and it often was pointed out that one important factor was a sense of pride of accomplishment. Attempts to increase the

importance of becoming a Diplomat were made in 1973 by Solon Braff, Chairman of the Section (1972-1974). Rather than be a roster of Diplomates for a referral directory, he wanted the emphasis to be on the fact these were optometrists with exceptional proficiency in the contact lens field. He wanted the Diplomates to be relied upon as lecturers for programs, or simply a resource for organizational or personal contact lens matters. In attempting to focus the profession's attention upon the importance of the Diplomat award, Braff noted that to be truly meaningful, every Fellow of the Academy who is completely competent in contact lenses should be recognized. He stated that about 60 percent of the eligible members were already candidates or had completed the requirements.

In November 1973, the Academy and the CLS suffered a tragic loss with the passing of one of its most distinguished members, Carel C. Koch. Koch served as the Academy's secretary for thirty-three years and editor of its Journal for forty-four years. He was a founder and the first secretary of the American Academy of Optometry, when it first became a permanent organization back in 1922.

The 1973 Max Schapero Memorial Award Lecturer was Irving Fatt, PhD. In 1974, Max Schapero Memorial Award Lecturer was Norman Sanders, MD. During Robert A. Koetting's term (1974-76), the 1975 Max Schapero Memorial Award Lecturer was Richard M. Hill, OD, PhD. In 1976, Max Schapero Memorial Award Lecturer was Joseph Krezanoski, PhD.

During **Robert W. Lester's (1977-1978) term**, changes were made to formalize the case reports by requiring that they be on specific areas of expertise, such as, bifocal contacts, keratoconus, and presbyopia to name a few. Section officers who gave Ellerbrock courses were asked to donate a portion of their honorarium fees to an account kept by the Secretary. These funds were later used to subsidize the honorarium and/or the expenses of the Max Shapiro lecturer. As Vice-Chair, he discovered that there was no "formal format" for the Section. During the ensuing few years, he researched the past form on function and wrote up a set of bylaws, which subsequently became the guide for later section activity. As Case Reports Chair, he formalized the requirements for case reports and set up a referee system of fellow diplomates to review case reports. Each case report was read and marked "re-do", "pass", or "fail". These reports were then returned to the author and either re-written or re-submitted. The system was designed so no one knew who the referees were and the referees did not know who the authors were. This made for a long drawn out process but it discouraged potential conflicts of interest and made the system fairer for everyone concerned.

The new Diplomates for 1977 were Richard Ebling and William C. Lee. The 1977 Max Schapero Memorial Award Lecturer was Brien A. Holden, PhD. The 1978 Max Schapero Memorial Award Lecturer was Norman Bier, D.Sc.

**William E. Fleischman (1979-80)** has the distinction of being the individual who petitioned the Executive Council for the name by which the Section is known today. In a letter to the Executive Council, February 24, 1981, he suggested that the CLS wished to be known as "The Cornea and Contact Lens Section". The rationale for the name

change was to eliminate the Section's association or connotation with the device. The Executive Council deliberated and subsequently approved the change from the Contact Lens Section to the CORNEA & CONTACT LENS SECTION. The recertification of Diplomates was an issue raised during his term that would be addressed some 10 years later with the introduction of a renewal process to recertify Diplomates. The most significant accomplishment of his term was the creation of the Founder's Award in 1979 to recognize individuals or groups who had made outstanding contributions to the art and science of contact lenses. Prior to the establishment of the Founder's Award, Richard M. Hill was the only person to receive recognition from the Section.

The 1979 Max Schapero Memorial Award Lecturer was Anthony B. Nesburn, MD. The 1980 Max Schapero Memorial Award Lecturer was Henry A. Knoll. The 1980 Diplomates were: Victor Arias, Mitchell J. Fink, Lawrence Fromm, Robert M. Gold, Patricia M. Keech, and Michael C. McClay.

**Sheldon Wechsler (1981-1982)** had an active term. On June 9, 1981, Max Talbott, PhD, the chief of the Biological Sciences Branch, Division of Ophthalmic; Ear, Nose, Throat; and Dental Devices; Bureau of Medical Devices circulated suggestions for contact lens product labeling in response to inquiries from manufacturers, practitioners, and consumers. While not proposed as regulatory requirements, the suggestions were to serve as a checklist for Bureau reviewers of proposed contact lens product labeling. The document was fraught with misstatements, spelling, and conceptual errors. Wechsler on behalf of the CLS carefully reviewed and responded to these inconsistencies within the Contact Lens Product Labeling draft and provided positive comments to Academy representatives for their consideration. On August 25, 1981, Wechsler received a communication from Merton Flom, AAO President, to comment on a draft report from Arthur Keeney, MD, Chair of the Z80 Committee on Standards of the American National Standards Institute. The report referred to the Z80.6 subcommittee's recommendations on the Physiochemical Properties of Conventional Hard Plastic Contact Lenses. He subsequently reviewed and commented on the draft and reported his findings to the Academy. The Candidates Guide was revised and the new guidelines were made effective January 1981. For the Ellerbrock, a CLS tract of contact lens courses developed. As the first chair of the Founders' Award Committee, William E. Fleischman and his committee nominated Otto Wichterle of Prague, Czechoslovakia. Professor Wichterle, the inventor of the first soft contact lens material, ultimately became the first recipient of this most prestigious award in December 1981.

On the November 16, 1981 an article in the AAO President's Newsletter expressed the need for everyone to understand the proposed bylaws changes that were approved by the Executive Council and up for adoption by the membership at the Orlando AAO Meeting, December 14th. The bylaws change was in response to the potential legal action for the AAO's total prohibition of advertising by its applicants and members. This unpopular action outwardly appeared to lower the traditional standards of conduct long associated with the AAO and advocated by the founding members. This measure was approved but it did change the perception of the AAO in the eyes of its membership.

The 1981 Founders' Award was presented to Professor Otto Wichterle. The 1981 Diplomates were: Shahane T. Kirman, William L. Moore, and Charles R. Wilder. The 1982 Max Schapero Memorial Award Lecturer was Solon M. Braff. 1982 Diplomates were: Walt Flora III, Gerald D. Funari, John P. Herman, Elwood H. Kolb, David Levenson, Clifford A. Scott, Joel A. Silbert, P. Sarita Soni, and Stanley J. Yamane. The 1982 Monday Symposium was: "New Contact Lens Materials - Blessing or Curse. The 1982 Tuesday Symposium was: "New Contact Lens Materials as Applied to Bifocal and Multifocal Designs."

**Michael G. Harris's, (1983-1984)** administration was the first to operate under the Section's new name of the Cornea & Contact Lenses Section. It was during his administration that a greater understanding and appreciation of their roles as contact lens organizations was fostered. On March 11, 1982, he directed a letter to Frank Fontana, Chair Elect of the AOA Contact Lens Section, requesting that the newly formed AOA Section consider changing its name due to possible confusion between Academy's Cornea and Contact Lens Section and AOA's Contact Lens Section. The AOA CLS was established by the AOA House of Delegates at its Annual Congress in Las Vegas, Nevada, June 1981. Fontana responded by saying that his Executive Board did not see a conflict but they did feel a meeting to discuss the issue was in order.

On July 20, 1983, Gordon Heath, AAO President, directed a letter to Frank Fontana requesting a meeting in San Francisco with Harris to establish a working relationship and ongoing communication between the AOA's Contact Lens Section and the Academy's Cornea & Contact Lens Section. This letter was prompted by the appearance in Volume 2, Number 1, Winter 1983, AOA CLS Newsletter, of an article that CLS Council members had met with Dr. George Murray, Director of the Bureau of Medical Devices of the FDA in November 1982 and the resulting comment was published: "The Section was established as optometry's spokesman in contact lens related matters."

The group met in San Francisco on September 9, 1983 with the following outcome. (1) Regarding the possible conflict of names, it was concluded that since the AOA called all of its' sub groups Sections; it would be difficult for the AOA CLS to change its name. (2) It was agreed that the two groups would work together for the betterment of the profession and the contact lens field. In doing so both groups should provide post papers about the role and the relationship between the two groups. (3) It was agreed to set up a liaison between the two groups. (4) Regarding a relationship with the FDA, and other government organizations it was tentatively agreed that the two groups along with should have input with these organizations.

It was unofficially agreed that AOA CLS would not hold itself out as "the" spokesman but as "a" spokesman for optometry. The agreement was to have the AOA Section handle the public relations aspects based on the strength of its membership and financial status, while Academy would provide expertise in academic, educational and scientific procedures and affairs. The two organizations clarified their individual positions within their respective organizations. The AOA CLS has its own bylaws and can take a position as a Section independent of that of the AOA, as long as the AOA CLS does not

indicate the position they are taking is an AOA position. The AAO Cornea and Contact Lens Section, on the other hand, does not have this type of autonomy. AAO CCLS is not an independent organization as is the AOA Section and is a subdivision of AAO so cannot make recommendations without the approval of the AAO Executive Council.

Modifications to case report requirements for Diplomate status were made as follows: (1) Goals of the case reports requirement be defined as: the candidate must demonstrate a breadth of expertise in various areas of contact lens fitting and know what he is doing in each of these areas. (2) The candidate must be able to adequately communicate that knowledge in a properly prepared ASE report. (3) That the components of the properly prepared case report be as follows: Symptomatology history, diagnostic tests and results, diagnosis, discussion of all treatment options, discussion of treatment plan and rationale for selection, and actual treatment including fitting, dispensing and follow-up indicating recognition and remediation of complications. The committee also decided that the number of published papers allowed as substitutes for case reports would be increased to a maximum of five, but only if the published paper concerned a subject area required by that particular case report.

December 1984, to clarify an issue of concern because of growing attention to credentialing and certification, the Executive Council expressed the position that neither Academy Fellowship nor section Diplomate status constitute certification of specialization and that diplomates are knowledge based, not competency based.

The 1983 Max Schapero Memorial Award Lecturer was Montague Ruben, MD. 1983 Diplomates were: Peter D. Bergenske, Charles Edmonds, Arnold R. Eger, Robert A. Heacock, David A. Rosenbloom, and Michael R. Spinell. The 1983 Monday program was "Symposium on Contact Lens Solutions - Clinical Perspectives." The 1983 Tuesday program was "Symposium on Adverse Ocular Response to Contact Lenses".

The 1984 Max Schapero Memorial Award Lecturer was Morton D. Sarver. The 1984 Founders' Award recipients were Professor Irving Fatt and Charles A. Bayshore. Monday Symposium (12/10/84): "Dry Eye and Related Parameters". Tuesday Symposium (12/11/84): "Contemporary & Innovative Contact Lens Procedures"

**Richard D. Brannen (1985-1986)** reported to the Executive Council the Section's intent to possibly expand the Diplomate Award to include the non-clinicians who are recognized authorities in the cornea and contact lens research area. These doctors may be affiliated in a research status with industry, educational institutions or government agencies and because they do not see patients routinely they would not qualify for the Diplomate Award. A committee composed of Sheldon Wechsler, Stephen Lester, and Maurice Poster studied this issue for over a year but could not come up with a final decision. To encourage more participation by Diplomates at the Annual Academy meeting, the Section decided to require all Diplomates to attend one Academy meeting at least every three years. A position paper was developed on the AIDS issue and transmitted to the Executive Council but not released to the media since the AOA Contact Lens Section had already addressed this issue extensively over the past year and that a statement from the Section would be redundant. The Diplomate guide was revised in January 1985 to bring it current with contact lens practices.

The 1985 Max Schapero Memorial lecturer was Donald R. Korb. The 1985 Founders Award was presented to the developers of the Polycon Gas Permeable Contact Lens (Guaranteed Contact Lens Company): Mr. Anthony Leone, Dr. Leonard Bronstein, Mr. Joseph Seidner, Dr. Leonard Seidner, Mr. Edwin Gary, and Dr. Norman Gaylord.) The 1985 Diplomates were Brian D. Garnett, Jeffrey T. Keller, and Daniel Penick. The Monday program was, "Symposium: Contact Lens Design for Optimum Clinical Performance". The Tuesday Symposium: "Hard Gas Permeable Contact Lenses Used for Extended Wear".

The 1986 Max Schapero Memorial Award Lecturer was Neal J. Bailey. The 1986 Monday program was "Hard Gas Permeable Contact Lens Design and Fitting". The Tuesday program was "Soft Contact Lens Hygiene and Corneal Infections".

In 1986, the Section lost distinguished Diplomate, Morton D. Sarver, who had served as the 1969-70 Section Chair.

The following press release was issued by the Cornea and Contact Lens Section on the subject of extended wear soft contact lenses:

"The American Academy of Optometry's Section on Cornea and Contact Lenses is aware of the potential adverse effects associated with the use of soft contact lenses on an extended wear basis. At each meeting since the development of extended wear lenses, the Section has presented research, clinical papers and numerous hours of lectures on these complications and the ways in which they are best managed.

At the Academy's recent meeting in Atlanta, Georgia, the Section once again addressed this issue and, in light of the recent publicity concerning these undesirable effects, it reaffirmed the belief that these problems can be significantly minimized by proper patient selection, professional lens fitting, and patient compliance.

It is recommended that anyone, before being fitted with extended wear lenses, consult a competent eye care practitioner who is experienced in contact lens fitting to determine if they are suitable candidates for this procedure. The eye care practitioner must be willing to provide the necessary follow-up care on a periodic basis since regular and on-going care is essential to minimize any adverse effects.

Patient failure to comply with the practitioner's instructions regarding routine follow-up care, wearing schedules and lens hygiene may result in complications from extended wear lenses. If wearers experience eye pain, discomfort, redness, discharge or decreased vision they should remove their contact lenses and consult their eye care practitioner immediately. By following these guidelines, patients significantly reduce the risk of serious adverse effects from extended wear lenses."

**Rodger T. Kame's (1987-1988)** term saw the Section function without the services of a Vice-Chair for a short period. With Gerald E. Lowther's election to the Executive Council in 1987, the Vice-Chair position was left vacant with this position's responsibilities being shared by the other Section officers. The candidate's guide was

revised and updated to meet the current needs and standards of the profession. The case report writing guide, likewise, underwent major changes and incorporated into the candidate's guide. The paper requirements were revised to accommodate published original works. In 1988, the non-clinical diplomate process was implemented. Brien A. Holden became the first to qualify as a "Non-Clinical Diplomate". This status was instituted to accommodate prospective diplomates who were in industry, research, and other special situations in which they did not render patient care and as such could not meet the clinical papers requirement. A caveat was that should that individual go into a clinical setting where patient care was rendered, they would have to reapply under the regular diplomate status. This allowed an avenue for diplomate status for scientists and researchers who have made significant contributions in the area of cornea and contact lenses but who do not provide clinical care and thus are unable to meet the case report and practical examination requirements. With the tract course lectures' doing well, a separate account was arranged within the Academy to fund the cocktail reception for new diplomates. The criterion in the selection process for the Max Schapero Memorial Award Lecture was reviewed. After much discussion it was decided not to change the existing guidelines. The Founders' Award was considered and it was agreed that it should be awarded to individuals who have contributed significantly to the field and qualification as a prior Max Schapero lecturer is not a necessity.

Dr. Kame had the distinction of being the first Chair of the Section who also served as the Chair of the AOA Contact Lens Section.

The 1987 Max Schapero Memorial Award Lecturer was Irvin M. Borish. No Founders' Award was presented in 1987. The 1987 Diplomates were: Joseph T. Barr, Edward S. Bennett, Jan P. Bergmanson, Glenda B. Secor, Steven S. Grant, Joseph P. Shovlin and Terry L. Steckman.

The 1988 Max Schapero Memorial Award Lecturer was Mathea Allensmith, MD. No Founders' Award was presented in 1988. 1988 Diplomates were: Jeffrey R. Dougal, Carmen F. Castellano, Dan A. Baggett, Bobby J. Christensen, Nieves M. Fernandez, Madeline L. Romeu, Brien A. Holden (first Non-Clinical Diplomate).

**Jack "Joe" Yager's (1989-1990)** term involved the first year of recovery from the EW scare, which raised the concerns of practitioners and patients alike.

The 1989 Max Schapero Memorial Lecture Award recipient was Robert B. Mandell. The 1989 Founders' Award recipients were Robert W. Lester and Maurice G. Poster. The Saturday Symposium (12/9/89): "What's New in Contact Lenses and Delivery Systems?" The Monday Joint Session with Section on Binocular Vision and Perception (12/11/89): "Contact Lenses and Binocular Anomalies".

The 1990 Max Schapero Memorial Lecturer Award recipient was Graeme Wilson, PhD. The 1990 Founders' Award recipients were Newton K. Wesley and George N. Jessen.

During **Barry Farkas's (1991-1992)** term a concerted effort was made to increase communication within the Section to rekindle camaraderie. Memo's describing activities, meeting places and issues of the Section were sent to everyone. A push to

obtain more international participation was another direction. The concept of a Speakers Bureau from within Diplomate ranks was developed. The services of this funded entity were to first be offered to optometry schools and later to the schools of ophthalmology and opticianry. A long- term goal of the Speakers Bureau was to supply both speakers and contact lens programs to state and local meetings. Efforts to create a amicable working relationship with the AOA CLS were prioritized. The most important Section development was the introduction of the Diplomate Renewal Process under the leadership of David A. Rosenbloom.

## RENEWAL OF DIPLOMATE STATUS

- I. Goals
  - A. To insure that Diplomates review and maintain basic knowledge and skills that related to contact lens education and clinical practice.
  - B. To insure that Diplomates keep abreast of current knowledge, developments, and events as they relate to cornea and contact lenses.
  - C. To maintain, both in image as well as in fact, the Cornea and Contact Lens Section’s role as the premier body in cornea and contact lens education, research and clinical practice.
  - D. To support the American Academy of Optometry in its efforts to maintain the finest program of education and research annually as lecturers, presenters and attendees.

### II. Requirements for Renewal of Diplomate Status

- A. Time Frame
  - 1. Diplomates will have five years, beginning on the decade and half decade, to satisfy the requirements for renewal.
  - 2. New Diplomates who achieved diplomate status in the third, fourth, or fifth year of the renewal period will be allowed to wait until the next renewal period before having to complete requirements for renewal.
- B. In order to renew their diplomate status each Diplomate must acquire 25 points within the five year period according to the following schedule:

	Activity	Points
1.	Attendance at Academy’s annual meeting	3
2.	Ellerbrock course attendance per hour	1
3.	Ellerbrock lecturer per hour (limit 4 pts/yr)	2
4.	Papers attendance per hour	1
5.	Paper presentation per paper (limit 2 pts/yr)	1
6.	Poster presentation (limit 1 pt/yr)	1
7.	Write portion of Diplomate exam, per year	2
8.	Serve as Case Reports Chair	2
9.	Serve as exam proctor, per year	1
10.	Read case reports, per year	1
11.	Serve on Section Executive Committee, per year	2
12.	Serve on Academy Executive Council, per year	2

C. Alternatives

As an alternative to the above point system the Diplomate may satisfy the requirements for renewal by the successful completion of one of the following;

1. Completion of the written, slide, and practical portions of the Diplomate exam in any one year.
2. Completion of a take home examination, to be administered by the Diplomate Award Chair, and completion of five case reports.

D. Administration

1. Administration of the renewal process will be the responsibility of the Secretary of the Section.
2. Compliance will be on the honor system. Each Diplomate will be responsible for keeping track of his/her points. However, spot checking will be done to insure compliance.
3. Disputes and failure to comply with the renewal process will be adjudicated by the Section Peer Review Committee.
4. Failure to comply may result in revocation of Diplomate status.

With the Ellerbrock Committee's decision to end track courses as of the 1991 AAO meeting in Anaheim, Patricia M. Keech's role as the Section representative to the Ellerbrock Committee took on increased importance. Patrick J. Caroline made Section history by becoming the first optician to qualify as a Diplomate. Other accomplishments of Section leadership included increasing industry support of the Section by some five fold, instituting conference calls to facilitate better preparedness for the annual meeting, formulating and updating bylaws and the Diplomate examination to increase accuracy and objectivity in grading.

The 1991 Max Schapero Memorial Award Lecturer was Stephen D. Klyce, PhD. No Founder's Award was presented in 1991. The 1991 Diplomates were: Dennis S. Burger, Dennis M. Kuwabara, and Thomas J. Quinn, Jr. The December 14, 1991 program was "Excimer Laser Technology for Photorefractive Keratectomy". The Monday morning program was "Clinical Research on the Cornea & Contact Lenses: A How-To Guide".

The 1992 Max Schapero Memorial Award lecturer was Antonio Henriquez, MD. The 1992 Founders' Award recipient was Solon "Bud" Braff. The 1992 Diplomates were: Douglas P. Benoit, Patrick J. Caroline, and Jon K. Hayashida. The December 1992 Saturday Symposium was the "Cutting Edge Techniques for Corneal Assessment". The Monday morning program was "The Role of Pharmaceutical Agents in Cornea and Contact Lens Care"

**Stephen F. Lester (1993-1994).** In 1993, the Section's Speakers Bureau was established with forty Diplomate presenters and 114 courses in the Speaker's Bureau Guidebook. The implementation of the program was slated for 1994 with the Guidebook being distributed to all of the schools and colleges of optometry. The Section approved paying the expenses and a maximum of 2 hours of honorarium. Glenda B. Secor is

credited with getting the project off the ground. Diplomates were solicited for courses and lectures would then be submitted to the Schools of Optometry. Industry was solicited for funds to insure the extension of this project.

The 1993 Max Schapero Memorial Award Lecturer was Kenneth A. Polse. The 1993 Founders Award recipient was Sheldon Wechsler. 1993 Diplomates were: James A. Boucher, Barbara Caffery, Michael J. Doughty (Non-Clinical), Clarke D. Newman, A. Christopher Snyder, and Evan B. Thomas. The Saturday morning program "Symposium: Recent Advances in the Tear Film and Immunology" and the Monday morning program was "Cornea and Contact Lens Research in Review Forum". The Saturday morning program featured an all Section Symposium on Aids and Infectious Disease. The Monday morning program was a Cornea and Contact Lens Research Review.

The 1994 Max Schapero Memorial Lecture Award was presented to Gerald E. Lowther, OD, PhD. The 1994 Founders' Award was presented in memory of Solon "Bud" M. Braff to Donald R Korb. The 1994 Diplomates were: Timothy B. Edrington, Langis Michaud, and David B. Seibel. Sunday's program was a Joint Symposium with the Primary Care and Vision Science Sections on "Photorefractive Keratectomy" Tuesday's Forum was "New and Continuing Issues and Controversies in Cornea and Contact Lenses. The first renewal period for the renewal process for all Diplomates certified before 1990 was set as December 31, 1994.

It was during **Stanley J. Yamane's (1995-1996)** term that the Section celebrated its 50th Anniversary, as the oldest Section within the Academy. With the election of Patricia M. Keech to Executive Council, Peter D. Bergenske moved to the Vice-Chair position and Karla Zadnik assumed the position of Secretary. In commemoration of the Section's 50th Anniversary, lapel pins were developed by Peter D. Bergenske and circulated. As part of the computer revolution, e-mail submission of case reports was considered by the Section with Steven S. Grant assigned to establish guidelines for electronic submission on a one year trial basis. Changes to the case reports included inserting aphakia in with hyperopia (category 2), adding a category addressing treatment and management of a corneal condition in which therapeutics treatments utilized (not limited to a contact lenses), adding an option on management of a refractive surgery patient or following significant corneal trauma to category 6, deleting extended wear from category 3 and moving category 10 into category 3, changing category 4 to read back surface toric or bitoric, changing category 5 to include soft toric lens, and defining cosmetic in category 8 to specify congenital or acquired disfigurement. The Section carefully considered and recommended membership in the Cornea and Contact Lens Section to be open to all Academy fellows in good standing who express a like interest in cornea and contact lenses. In reference to the renewal process, Diplomates who had not completed their renewal process were informed that they should either go to emeritus status (if eligible) or their Diplomate status will be revoked. Six contact lens student travel grants were established. The Past Chair's Reception held at the annual meeting was developed to honor past leadership of the Section. The Section adopted a new mission statement and strategic plan. The mentoring program was highlighted and

a semi-annual newsletter produced. The Mid-year Planning meeting was held in Atlanta in February.

The 1995 Max Schapero Memorial Lecture award recipient was Michael G. Harris, OD, JD. The 1995 Founders' Award was presented to Edward I. Goodlaw and Robert A. Koetting. The 1995 Diplomates were: Kurt J. Moody and Cristina M. Schnider. The Saturday Program (12/9/95) was "Contact Lenses, Conjunctiva, Cornea, Solutions, Materials and Success". Monday's program (12/11/95) was "Cornea & Refractive Surgery".

The 1996 Max Schapero Memorial Lecture Award recipient was John P. Schoessler. The 1996 Founders' Award recipient was William E. Fleischman. The 1996 Diplomates were: Milton M. Hom, Dennis Karambelas, Jeffrey C. Krohn, Richard G. Lindsey, Timothy T. McMahon, and Loretta B. Szczotka. The Friday Forum (12/6/96): "Contact Lenses, Cornea and New Approaches to Refractive Condition". The Monday Joint Symposium (12/9/96): "Keratoconjunctivitis".

**Peter D. Bergenske (1997-1998).** The Section presented two outstanding symposia and provided lecturers for 22 Ellerbrock Continuing Education Courses. The Diplomate process was quite active with seven candidates completing the process, including one Research Diplomate. A major undertaking was the review of the Section Budget to insure more accurate financial planning in the future. Through the generosity of outside support from Vistakon and CIBA Vision, the Section was able to conduct mid-year and pre-convention meetings at no cost to the Academy. Other direct financial support was received from Wesley-Jessen (orientation breakfast) and Lifestyle Contact Lenses (past-chairs reception). The practical examination for the Diplomate Program was held at Brooke Army Medical Center at Fort Sam Houston hosted by Major Neil Glenesk. A change in the Academy's policy allowed the new Diplomates to be presented on stage at the Banquet.

Glenda B. Secor chaired the Section's Scientific Program by presenting two excellent symposia. The Friday afternoon symposia presenters' were: Loretta B. Szczotka, Cynthia Roberts, David W. Hansen, Paul Karpecki, and Charles May. Monday's program, moderated by Joseph P. Shovlin, featured Timothy Grant, Oliver Schein, Dwight Cavanagh, and Brien A. Holden. In addition, there were 117 Cornea & Contact Lens related posters and 27 papers presented.

In keeping with the 75th Anniversary theme, the Section undertook two specific projects. The first was the production and funding of the 75th Anniversary "mouse pad", which was provided to each annual meeting attendee. Jeffrey C. Krohn handled this project for the Section. Dennis M. Kuwabara reviewed all existing Section minutes/papers and interviewed most of the past officers of the Section in order to write a history of the Section. A brief presentation of this history was included in the Friday AM program. A first draft has been distributed and with the intent that it will be updated annually. Clarke D. Newman and Jeffrey R. Dougal began work on bringing the Section to the Academy's web site. At the Section's mid-year planning meeting the Executive Committee voted to expand the support of residents to include all cornea and contact lens residents in optometry based residency programs. Under the coordination of

Timothy B. Edrington, eleven residents attended this year's Annual Meeting with Section support: Mohinder Merchea, James E. Winnick, Sandy Yee, Michael Ashman, Katherine Henning, Sarah Yee, Maria Miranda, Timothy Suorsa, Terry Tsang, Bradly Kepp, Karen K. Yeung, and Jeff Johnson. A proposed response to the FTC with regard to contact lens prescription release was forwarded to the Executive Council for consideration and submission as an official AAO Statement to the FTC.

The 1997 Max Schapero Memorial Award Lecturer was Rodger T. Kame and his lecture was entitled, "Contact Lenses and the Shaping of the 21st Century". The Founder's Award was presented to Robert B. Mandell. The 1997 Diplomates were: Steve Hanley, Larry J. Davis, Robert L. Davis, Dena M. Mintz, Heidi Wagner, George Mertz, and Howard B. Purcell. The Friday Symposium (12/12/97) was "Bits, Bytes, Flaps and Zaps, New Technology to Reshape the Anterior Segment." The Monday Symposium (12/15/97) was "Will the Cornea Ever Be Ready for Extended Wear?"

The 1998 Max Schapero Memorial Award Lecturer was Barry A. Weissman. The 1998 Founder's Award was presented to Richard M. Hill. Dr. Maurice Poster, who was a past Founder's Award recipient and Section Chair passed away during the summer of 1998. Professor Otto Wichterle, the inventor of the soft lens material and a past Founder's Award recipient, also passed away. The 1998 Diplomates were: Louise A. Sclafani, Lyndon W. Jones, Desmond Fonn, and Nathan Efron. A program entitled, "Contact Lenses and Lasers: Saga or Soap Opera?" featured Drs. Barr, Harris, Erickson, Quinn, Becherer, Fonn, Holden and Manche. A symposium on steroid therapy was jointly hosted by the Corneal & Contact Lens, Ocular Disease, Primary Care and Visual Sciences Sections. The symposium entitled, "Steroids and Their Complications" was hosted by Tom Freddo and included Howard Leibowitz, Jimmy Bartlett, Daniel Goodman, and John Samples.

**Karla Zadnik (1999-2000).** The C&CLS program was entitled Post Refractive Surgery – Why is my 20/20 not clear?

New guidelines to broaden the scope of Cornea and Contact Lens Examinations were instituted:

- Case Reports – Candidate to select 10 of 15 possible cases. New cases include:
  - Treatment of severe dry eye or lacrimal apparatus
  - Treatment of ocular allergy
  - Treatment of corneal dystrophy or degeneration (not keratoconus, globus, pellucid)
  - Treatment of systemic disease with corneal findings
  - Treatment of refractive surgery complications
- Case reports will require a discussion of the pathophysiology of the condition.
- Slide examination will include topography.
- Written examination will include 10% each in the areas of cornea and related anatomy and physiology, corneal pathophysiology, contact lens options, contact lens design and fitting, contact lens materials, contact lens

related physiology, contact lens complications, refractive surgery, corneal disease and contact lens solutions. It will include the topics of RGPs, special designs for astigmatism and bifocals, scleral lenses, history and keratoconus.

- Oral examination committee composition will depend upon case report emphasis.

The 1999 Max Schapero Memorial Lecture Award was presented to Alan Tomlinson, PhD, DSc. The 1999 Founder's Award went to Paul F. White, OD. The new Diplomates for 1999 were: Bruce Anderson, OD, Russell Laverty, OD (both Clinical), and Barbara Fink, OD, PhD. (Research)

The 2000 Max Schapero Memorial Award Lecturer was Leo G. Carney. The 2000 Founder's Award was presented to Theodore Grosvenor. The program was Extended Wear, Presbyopia in the 21<sup>st</sup> Century. The new Section Diplomates were: Vinita A. Henry, Janice M. Jurkus, Jennifer L. Smythe, and Karen K. Yeung.

Regrettably, the Section lost two distinguished Diplomates, William E. Fleischman, the 1979-80 Section Chair, in February 2000, and Rodger T. Kame, the 1990-91 Section Chair and 1997 Max Schapero Award recipient, in July 2000.

**Joseph P. Shovlin (2001-2002).** Unfortunately, since the 2001 Philadelphia meeting followed the 9-11 disaster, the meeting attendance was down significantly. Historically, this was the last year for the traditional five-day format for the Academy. The joint symposium with the Disease Section entitled, "Lenses, Lasers, and Lifestyles" and Ocular Allergy was extremely well received. In 2001, the Section welcomed 5 new Diplomates: Dwight H. Akerman, Lisa Badowski, Shelley I. Cutler, Susan A. Resnick, and Mary Jo Stiegemeier. The 2001 Max Schapero Memorial Award Lecturer was Michael Doughty. The Founder's Award recipients' were Joseph Goldberg and Donald Brucker.

In 2002, San Diego welcomed the attendees with the new four-day format, which was well attended. The 2002 Diplomates were: Sally M. Dillehay, Harue J. Marsden, Lee E. Rigel, and James E. Winnick. The joint symposium with the Disease Section was entitled, "Clinical Conundrums in Contact Lenses" and "Microbial Keratitis". The 2002 Max Schapero Memorial Award Lecturer was Desmond Fonn, and the Founders' Award recipients were Robert Morrison and a Melvin Remba.

Dr. Shovlin has the distinction of being only the second Chair of the Cornea and Contact Lens Section to have also served as Chair of the AOA Contact Lens Section.

**Joseph T. Barr (2003-2004).** There were no new Section Diplomates in 2003, although there were 38 candidates in the Diplomate Award process. Glenda Secor prepared a new poster on how to become a Diplomate in the Section. Melissa Bailey the first Section sponsored Ezell Fellow attended many sessions. The Speakers' Bureau had 10 speakers funded by Ciba Vision and Cooper Vision funded travel fellowships for over 20 contact lens residents. The 2003 Max Schapero Memorial Award lecturer was Nathan

Efron, whose presentation was entitled, "Bugs, Corneas and Contact Lenses: Are we doing better? The 2003 Founder's Award recipients were David Ewell and Robert Lohr.

In 2004, Drs. Fink, Fonn, and Bergmanson undertook the Research Diplomate process. Historically, multiple discussions with the Optometric Council on Refractive Technology (OCRT) and the Section took place. As a result, John Herman drafted a Diplomate process proposed for Section Diplomacy on refractive technology. The Section sponsored Ezell Fellow for 2004 was Loretta Szczotka-Flynn. The 2004 Max Schapero Memorial Award Lecturer was Deborah Sweeny. The 2004 Founder's Award recipient was Stanley J. Yamane.

**Glenda B. Secor (2005-2006).** Dr. Secor began her meetings with the reciting of the Section mission statement, "Fostering professional growth and advocating excellence in patient care through leadership in education and research." so everyone could appreciate how important their duties were to the Section. After considerable debate and discussion within the Section, the initiation of the Refractive Technology Diplomate track became a reality and candidates were allowed to begin the process. With the appointment of a webmaster, Sally Dillehay, the hope was to improve the website and provide the Section Newsletter electronically. The website is capable of providing press releases, search options for finding Diplomates and certificates of attendance and renewal points will also be available online shortly. The Symposium programs were: Refractive Technology Symposium and "Understanding the Risks of Continuous Wear: New Clinical Findings", moderated by Mark Bullimore. The three new 2005 Section Diplomates were Jason J. Nichols, Carla J. Mack, and Kaaryn Pederson. The 2005 Max Schapero Memorial Award Lecturer was Dwight Cavanagh. The 2005 Founder's Award recipient was Kyoichi Tanaka of Nagoya, Japan, the Founder and President of Menicon. Former Section Chair, Stanley J. Yamane, was recognized by the Academy with the Eminent Service Award. The 2005 Section Ezell Fellow was David Berntsen.

2005 was also the first year of the new five-year Diplomate Renewal Program cycle. Changes to the point system included:

- Change "Ellerbrock" to "Lectures and Workshops" (2 points/lecture; 4 points maximum)
- Paper or poster at AAO or any other approved meeting (2 points maximum for paper; 1 point for poster)
- Published article in refereed journal or book chapter (3 points maximum)
- Speaker's Bureau participant (3 points maximum)
- Duties/activities approved by Chair (5 points maximum)
- Section Executive Committee (5 points)

The highlights of a busy 2006 included the approval of the Section Bylaws, assigning of Dennis M. Kuwabara to update the Section History, participation in the discussions with industry and the AOA to develop responses to media and professionals regarding the Fusarium outbreak and the subsequent withdrawal of B&L's MoistureLoc MPS from the market, participation in the Optometry 20/20 Summit, and the endorsement along with the AAO of HR 6117 legislation. Programs included: "Refractive

Technology: What Every Optometrist Needs to Know” by Drs. Tullo, Owen, Karpecki & Laurenzi, “Collaborative Longitudinal Evaluation of Keratoconus (CLEK) Update” by Drs. Zadnik, Edrington, Barr and McMahon, and “Refractive Solutions for a Lifetime: Recent Study Results/New Clinical Findings.” by Drs. Walline, K. Nichols, and Caffery. The 2006 Diplomates were Mohinder M. Merchea, Susan J. Gromacki and Brett D. Ringger. The 2006 Max Schapero Memorial Award Lecturer was Jan Bergmanson, who spoke on “When Thinner is Not Better”. The Founders’ Award was presented to Drs. Neil Bailey and Irvin M. Borish. Joseph T. Barr did both Neil Bailey’s introduction and acceptance. Donald R. Korb gave Irvin M. Borish’s introduction and Bill Baldwin accepted the award in absentia.

Regrettably, the Section lost three of its distinguished Diplomates: David G. Ewell (2003 Founder’s Award recipient) in July 2005, Donald Brucker (2001 Founder’s Award recipient) in December 2005, and Lester Janoff in 2006.

**Steven S. Grant (2007-2008).** During Dr. Grant’s two-years, he continued the tradition of reading the Section Mission Statement before each meeting. In 2007, there was a 6-7X increase in reported cases of acanthamoeba keratitis. AMO’s Complete Moisture Plus solution was recalled due to a statistically significant number of the cases involving that solution. The Section’s Ezell Fellowship Award became fully funded in 2007. The 2007 Section Ezell Fellow was Jessica Mathew, OD. Section programs included the Joint ARVO/AAO Symposium, co-sponsored with the Section on Public Health & Environmental Optometry, entitled: “Advances in Dry Eye Disease: Women, Nutrition, and Impact on Vision and Quality of Life.”

After the Section Awards Program, Jeff Walline and Marjorie Rah presented their lecture: “Kids and Contact Lenses”. The 2007 Max Schapero Memorial Lecture Award went to Oliver Schein, MD, MPH. His lecture was entitled: “The Epidemiology of Contact Lens Related Microbial Keratitis: A 25 Year Perspective”. The Founders’ Award was presented to Perry Rosenthal, MD and to Vistakon, for the 20<sup>th</sup> anniversary of Acuvue as the first disposable contact lens. The new Section Diplomates for 2007 were: Tony Chahine, Charlotte Joslin, Renee Reeder, Gregg Russell, and our first two Refractive Technologies Diplomates, Joseph Stamm and Manoj Vankiteshwar.

In 2008 there was further activity regarding acanthamoeba and contact lenses. The FDA held a meeting to get input on contact lens solution testing and usage. The Section attended the meeting and Charlotte Joslin presented information pertaining to the importance of rub & rinse, compliance issues and the need to add acanthamoeba to the list of challenge organisms. At the pre-meeting meeting, the suggestion was made to change the name of the Section to better reflect who we are and what we do/are all about. The proposed change to be presented to the Academy Board of Directors was: The Section on Cornea, Contact Lenses and Refractive Technologies of the American Academy of Optometry. This change was approved by the Academy Board of Directors in November 2008. The 2008 Section Ezell Fellow was Eric Ritchey, OD, MS. Section programs: The Section Symposium was entitled: “Beyond Oxygen: The Future of the Contact Lens”. Moderated by Desmond Fonn, the program speakers included Drs.

Fonn, Lyndon Jones, Eric Pappas, Trefford Simpson, Mark Wilcox, Kathy Dumbleton, Debbie Sweeney, Dwight Cavanagh and Brien Holden.

Following the Section Awards program, Chris Freeman, David Rancone and Michael Twa presented their lecture entitled: "What's New in Refractive Surgery?" The 2008 Max Schapero Memorial Lecture Award was presented to Noel Brennan, BS Optom, PhD. His lecture was entitled: "Corneal Oxygenation with Contact Lens Wear". The Founders' Award went to Morton Greenspoon, OD. 2008 also saw the awarding of the first Exemplary Service Award by the Section. It was presented to Richard Brannen, OD, M.Opt., at the Section Awards program. The new Section Diplomates were: Bill Long and Peter Simmons under the Research heading, and Colleen Riley and Stefan Schwarz under Clinical. Timothy McMahon was elected to the Academy Board of Directors and as such, had to leave our Section Leadership. Clarke Newman was chosen to fill the vacant Diplomate Award Chair spot created by Tim's departure.

On a sad note, the Section lost several colleagues in the past two years. In 2007, Dorris Fontana (wife of Frank Fontana) passed away, and in 2008 Mort Silverspoon, Ted Bayshore and Mary Edith "Honey" Snider (Ed Bennett's mother) left us.

**Edward S. Bennett (2009 – 2010).** 2009 was a busy year for new Chair Ed Bennett. He represented the Section at the British Contact Lens Association Annual Meeting, met with the leadership of the AOA Contact Lens and Cornea Section during the AOA Annual Meeting, and represented the Section at the International Society of Contact Lens Specialists meeting in Boston.

Section Programs were as follows: On Thursday, the ARVO/AAO Joint Symposium: Ocular Genetics: Focus on the Anterior Segment was moderated by Loretta Szczotka-Flynn, OD, MS, FAAO. On Friday, the Section Program was: The FDA Takes Action: Raising the Bar on Contact Lens Solution Efficacy. This was followed by the Section Awards Program.

The 2009 Founders' Award went to John DeCarle. The Max Schapero Memorial Lecture was presented by Karla Zadnik, OD, PhD. The Exemplary Service Award was presented to Dennis Kuwabara, OD.

2009 Diplomates: Peter Russo, OD (Clinical), Jeffrey Walline, OD, PhD (Research) and David Rancone, OD (Refractive Technologies).

Sadly, the profession lost several prominent colleagues in 2009: Pat Cummings, OD, Rob Bresse, OD, Norman Bier, DSc.(Max Schapero Memorial Lecture Awardee 1978) and past Academy President N. Rex Ghormley, OD.

## **SECTION CHAIRMAN AND OFFICERS**

Chair	DAN O. ELLIOT (1964-1965)
Past Chair	
Vice Chair	Harold Moss
Secretary	
Chair	HAROLD MOSS (1965-66)

Past Chair	Dan O. Elliot
Vice Chair	Charles A. Bayshore
Secretary	
Chair	CHARLES A. BAYSHORE (1966-68)
Past Chair	Harold Moss
Vice Chair	Maurice G. Poster
Secretary	
Chair	MORTON D. SARVER (1968-1970)
Past Chair	Charles A. Bayshore
Vice Chair	Maurice G. Poster
Secretary	
Chair	MAURICE G. POSTER (1970-1972)
Past Chair	Morton D. Sarver
Vice Chair	
Secretary	Charles A. Bayshore
Chair	SOLON "BUD" M. BRAFF (1972-1974)
Past Chair	Maurice G. Poster
Vice Chair	
Secretary	Charles A. Bayshore
Chair	ROBERT A. KOETTING (1974-76)
Past Chair	Solon M. Braff
Vice Chair	Robert W. Lester
Secretary	Charles A. Bayshore
Chair	ROBERT W. LESTER (1977-78)
Past Chair	Robert A. Koetting
Vice Chair	William E. Fleischman
Secretary	Charles A. Bayshore
Papers	Michael G. Harris
Courses	Jack F. Hill
Diplomate	Sheldon Wechsler
Case Report	Richard D. Brannen
Written	Leonard Bronstein
Clinical	Joel T. Hirsch
Practical	Rodger T. Kame
Chair	WILLIAM E. FLEISCHMAN (1979-80)
Past Chair	Robert W. Lester
Vice Chair	Sheldon Wechsler

Secretary	Charles A. Bayshore
Program	Michael G. Harris
Courses	Maurice G. Poster
Diplomate	Richard D. Brannen
Chair	SHELDON WECHSLER (1981-1982)
Past Chair	William E. Fleischman

### **MAX SCHAPERO MEMORIAL LECTURE**

The Max Schapero Memorial Lecture was established in 1972 to honor the memory of Max Schapero who was a dedicated member of the Section and the Academy. Max Schapero (1921-1972) served for a number of years as the Chair of the

Section's Papers and Program Committee. Professor Schapero was on the faculty of the Southern California College of Optometry faculty and was the author of the "Dictionary of Visual Science" and a text entitled "Amblyopia". After his untimely death in 1972, the Section established this memorial lecture in his honor. The award is in the form of a plaque that is given to a clinician, researcher, or scholar who has made a significant contribution to the cornea and contact lens field by virtue of his publications, lectures, or research efforts. The Max Schapero Memorial Lecture Award Committee decides who shall be chosen to receive this annual award. The Committee is made up of the four recent Past Chairs of the Section, the Chair, and Vice-Chair of the Section. The Committee is chaired by the Immediate Past Chair of the Section. Recipients are asked to present a one to one and one half hour lecture during the Cornea and Contact Lens Section's meeting held at the American Academy of Optometry's Annual Meeting. The topic and content of the lecture are left to the discretion of the recipient and the Committee but it should relate to the recipient's work in the cornea and contact lens field.

### **MAX SCHAPERO MEMORIAL LECTURE AWARD RECIPIENTS**

1973 Irving Fatt, PhD  
1974 Norman Sanders, MD  
1975 Richard M. Hill, OD, PhD

- 2007 Oliver D. Schein, MD, MPH
- 2008 Noel Brennan, BS.Optom, PhD
- 2009 Karla Zadnik, OD, PhD

### **FOUNDERS' AWARD**

This award is in the memory of and in honor of those Academy Fellows who founded the Contact Lens Section of the American Academy of Optometry. The award was originally the Policoff Award, honoring one of the Section founders, William W. Policoff. As other Founders died, it seemed wise to change the name to honor all the founders of the Section with one award. Since the Policoff Award was never approved by the Executive Council, the Section in 1979 renamed this award the "Founders' Award". As such, there have been no recipients of the Policoff Award, only the Founders' Award. This award is flexible in that the Section can forego making or presenting it to one or more worthy individuals at each meeting.

The Founders' Award is in the form of a "plaque of recognition". The award (or awards, not more than two per year) is to be presented to the individual, group, or company who has made an outstanding contribution to the clinical aspect of the art or science of contact lens fitting.

The Cornea and Contact Lens Section Executive Committee nominates the recipient or recipients. The Section Executive Committee consists of the Section Chair, Vice-Chair, Secretary, Treasurer, Program Chair, Diplomate Award Chair, and the Immediate Past Chair. The committee is chaired by the Immediate Past Chair. The documented nomination or nominations shall reach the Academy Awards Committee Chair by the first day of September prior to the annual meeting, with copies to the Academy President and Academy Secretary-Treasurer. The decision by the Awards Committee to recommend no award, one award, or two awards shall be made to the Academy Executive Council by October 1 of each award year.

The expense of preparing "plaques of recognition" is to be borne by the Cornea and Contact Lens Section.

The presentation of this award is to be done by the Contact Lens Section Chair at the Annual Contact Lens Section Meeting.

## FOUNDERS' AWARD RECIPIENTS

- 1981 Otto Wichterle, PhD  
1984 Irving Fatt, PhD  
Charles A. "Ted" Bayshore, OD

2007 Perry Rosenthal, MD  
VISTAKON, J&J  
2008 Morton Greenspoon, OD  
2009 John DeCarle

### **EXEMPLARY SERVICE AWARD**

This award is in recognition of exemplary service and honors those individuals who have given their time and energy to the Section. A “plaque of recognition” is presented. No monetary award or expense reimbursement is offered to awardees. The awardee receives a plaque at the Awards Program and the cost of the plaque is to be budgeted from the Section operating funds. The Awards Committee chooses the recipient(s).

### **EXEMPLARY SERVICE AWARD RECIPIENTS**

2008 Richard D. Brannen, OD, MOpt  
2009 Dennis M. Kuwabara, OD

## **REPORTING PROCEDURE FOR FUTURE AAO CCLS CHAIRMEN**

For historical purposes, providing the following information should be a part of the Chairman's duties and responsibilities as Section Chair. This information will serve to provide a more comprehensive perspective of the activities of the Section for each term.

- A. Chairman's Name
- B. Mailing Address
- C. Telephone numbers (Home, Office, Fax, E-Mail)
- D. Term of Office
- E. Names of Section Officers, Committee Members, & Their Titles  
(Attach copy of stationery, if available)
- F. Awards: Founder's Award Recipient  
Max Schapero Award Recipient  
New Diplomates (Names/address)
- G. Symposium Programs: (Titles & Presenters)
- H. Summary/Highlights (Attach copy of Annual Report to Executive Council)
- I. Other historical points
