letter of welcome

At the end of my first year as president of the American Optometric Foundation (AOF), I have discovered that the position is more challenging and satisfying than I could have predicted. It is truly an honor to serve in the leadership of organizations like the AOF and the American Academy of Optometry. I want to share with you some highlights of fiscal year 2000-2001, the first of the new millennium.

Over the years, the AOF has played an important role in optometric philanthropy. In 2000-2001, three new AOF programs were developed with gifts made by generous Academy Fellows; one to support aspiring students, one to recognize outstanding educators, and one to honor a true giant in the field of optometric education and research.

Gifts made in the name of loved ones can inspire philanthropy in others while furthering a personal cause at the same time. Few gifts offer greater satisfaction than the establishment of a scholarship. The Antoinette M. Helfant Memorial Scholarship was established to assist exceptional optometry students in financial need who otherwise could not afford an education in optometry. The AOF and the donor were astonished by the outpouring of applications received for this new scholarship. While we were delighted to have this opportunity to make a real difference in the life of a needy student, we cannot forget about the many others that we could not help.

In the past little recognition has been given for outstanding teaching in optometry although educators play such a critical role in our profession’s future. The Michael G. Hunt Faculty Award for Excellence in Optometric Education was created to recognize ongoing and consistent excellence in the education of optometry students and the advancement of optometric education. The donor, an outstanding educator in his own right, wanted to honor his parents who instilled in him a love of learning; the importance of excellence in education and the value of outstanding educators.

The Glen A. Fry Lecture Award is given annually by the American Academy of Optometry to recognize a distinguished scientist or clinician for current research contributions. The award, established in 1970 and sponsored by the AOF, honors Dr. Fry, a remarkable man who touched the lives of so many as an educator, advisor, researcher, and mentor. This year, the AOF established an endowment and initiated a fundraising campaign to fund the award in perpetuity.

In addition to these new programs, the AOF administers numerous programs that further our mission of supporting education and research. Recipients of all AOF awards and grants are listed throughout this annual report. The oldest and most prestigious of these is the William C. Easton Fellowship Program, which supports postgraduate students who plan to pursue an academic career in optometry and vision science. The training of qualified educators and researchers is critical to optometry’s future. The AOF is grateful to the following corporations for sponsoring the 2000-2002 East Fellowship: Bausch & Lomb, CIBA Vision, Eastman (2 Fellowships), TLC Laser Eye Centers and Vitakon.

Fiscal year 2000-2001 was a very successful year for the AOF. This was due to a team effort that included the AOF Board of Directors and the Academy’s Executives Council, Research Committee and Awards Committee. A great deal of credit must be given to the leadership skills of my predecessor, Dr. Earl L. Smith, III. We also appreciate Lisa Schoenhofer and her Academy staff including our Foundation Director, Christine Armstrong, and Development Associate, Linda Rhoad. Finally, I want to thank everyone who has contributed support to the AOF mission. I hope you will continue to support these efforts.

Sincerely,

George W. Morris, O.D., F.A.A.O.
President
ezell fellowships

Inspired by the need to advance optometric research and education, Dr. William C. Ezell founded the American Optometric Foundation (AOF) in 1947. As a means to fulfill his vision, AOF established the William C. Ezell Fellowship. To this day, the Ezell Fellowship program continues to provide financial support to postgraduate students who plan to pursue an academic career in optometry and vision science.

Over the past half-century, AOF and the Ezell Fellowship program has helped advance optometric education what it is today. The list of former Ezells includes, doctors, presidents, and prominent faculty members at the schools and colleges of optometry. AOF adorns the Ezell Fellows, past and present, for their contributing contributions to vision science and the profession of optometry.

* 2001 Ezell Fellow
Ezell Club
2001-2002 ezell fellowships

Bausch & Lomb ezell fellow

Chuan Kee, BSc, Optom, MA
University of Houston
College of Optometry

Research Focus: The effect of astigmatism on refractive development of the eye.

"... the knowledge and experiences that I have gathered during this period will strongly influence my career as an optometric educator and vision researcher. Specifically, the fellowship not only allowed me to conduct and publish my research related to eye growth, it has allowed me to participate in scientific conferences and to broaden my views through discussions with other researchers."

Ciba Vision ezell fellow

Patrick Ludgate, BOptom
University of Houston
College of Optometry

Research Focus: Effects of extended contact lens wear on the proliferation rate of the corneal epithelium.

"Being an AOA Ezell fellowship recipient is a tremendous honor. A sincere thank you to the many contributors and volunteers of the AOA for numerously and financially encouraging young graduate students in their preparations for an academic career."

Essilor ezell fellows

Pete S. Kollhaas, OD
Indiana University
School of Optometry

Research Focus: Evaluations of intraocular lenses and the optical quality of aging eyes.

"The William C. Ezell Fellowship, supported by the American Optometric Foundation and companies like Essilor, is a great opportunity and honor for a young optometric educator and vision researcher like myself. Looking through the list of past winners, most of whom are now leaders in the profession, is very motivational and awe-inspiring."

Jeffrey J. Walline, OD, MS
The Ohio State University
College of Optometry

Research Focus: Examination of the effects of rigid gas permeable contact lenses on myopia progression in children.

"Being a three-time William C. Ezell Fellowship recipient is a tremendous honor. I am delighted to be listed among the prestigious roll of prior awardees, and I hope to fulfill the high standards accomplished by previous Ezell Fellowship winners."

TLC ezell fellow

Andrew T. E. Hartwick, OD, M.Sc.
Department of Anatomy and Neurobiology
Dalhousie University

Research Focus: Examining the underlying mechanisms for neuron degeneration that occurs in glaucoma.

"It truly is a privilege to have been chosen as an Ezell fellow, and I am extremely grateful for this honor. This support enables me to commit to my Ph.D. studies full-time, and it is my goal to use this training to establish myself as a productive optometric researcher and educator."

Vistakon ezell fellow

Jason J. Nichols, OD, MS
The Ohio State University
College of Optometry

Research Focus: Comparison of the daily disposable and extended wear contact lens modalities.

"I cannot stress enough the importance of the Ezell fellowship program to the profession of optometry, and for Vistakon's continued support of the program. As the 2001-2002 Vistakon-sponsored Ezell Fellow, thank you."

THE AMERICAN OPTOMETRIC FOUNDATION
research & educational support

We are proud to recognize the outstanding students and researchers who received financial support through the American Optometric Foundation's scholarship, grant, and award programs. We also extend our appreciation to our corporate sponsors whose generosity made this funding possible.

planned gifts

giving can be a creative endeavor

A well-structured approach to giving will complement your overall financial plan while generating greater benefits for the American Optometric Foundation. Planned gifts benefit the AOF in the future and perpetuate long-term funding of optometric research and education. Planned gifts may be in the form of cash, securities, property, bequests, charitable gift annuities, and charitable trusts.

Planned gifts can be designated for general purposes, or restricted for a specific intent. Every student and researcher helped through the American Optometric Foundation is a tribute to the commitment of the special donors who support our mission each year.

gifts by will

Contributions received through bequests are a vital part of our planned giving program and help endow future programs and initiatives. A donor may choose to designate the American Optometric Foundation as the recipient of a bequest through his/her will by naming AOF to receive a specific dollar amount or a percentage of the residual estate.

Gifts by will enable a donor to make a significant contribution to AOF while retaining full control of his/her assets.

To include a bequest to the American Optometric Foundation in your will, we suggest this simple statement: "I give, devise, and bequeath to the American Optometric Foundation, 610 Executive Boulevard, Suite 506, Rockville, MD, 20852, the sum of $____ (or ____% of my residual estate, or otherwise describe stocks, bonds, real estate, or other assets) to be used for general purposes (or describe a specific purpose)."

legacy society

The Legacy Society recognizes the following individuals who have informed us that the American Optometric Foundation is designated as a beneficiary of a bequest through their will:

Anthony and Elna Adams
Bill and Honey Baldwin
Brett and Robin Benze
Irvin M. and Beatrice Borish
Bert and Lydia Corwin
Sidney and Martha Greenberg
Michael G. Harris
William R. Jackson, Jr. Estate

Dottie and Lila Jans Estate
Gerald and Andrya Loberer
